		•	MAIL DATE	DELIVERY MODE
			05/16/2007	PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

	Application No.	Applicant(s)				
	10/044,113	REAM ET AL.				
Office Action Summary	Examiner	Art Unit				
•	Hasan S. Ahmed	1615				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address						
Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1) Responsive to communication(s) filed on 01 M	1) Responsive to communication(s) filed on <u>01 March 2007</u> .					
,	,					
	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is					
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.						
Disposition of Claims						
4) Claim(s) 8-20 is/are pending in the application.	•					
4a) Of the above claim(s) is/are withdrawn from consideration.						
5) Claim(s) is/are allowed.						
7) Claim(s) 6-20 is/are rejected.	6) Claim(s) 8-20 is/are rejected.					
8) Claim(s) are subject to restriction and/or election requirement.						
Application Papers						
9) The specification is objected to by the Examiner.						
10) The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner.  Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).						
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).						
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.						
Priority under 35 U.S.C. § 119						
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).						
a) All b) Some * c) None of:						
1. Certified copies of the priority documents have been received.						
2. Certified copies of the priority documents have been received in Application No						
3. Copies of the certified copies of the priority documents have been received in this National Stage						
application from the International Bureau (PCT Rule 17.2(a)).						
* See the attached detailed Office action for a list of the certified copies not received.

#### **DETAILED ACTION**

Receipt is acknowledged of applicants' amendment, which was filed on 1 March 2007.

\* \* \* \* \*

### **Priority**

The later-filed application must be an application for a patent for an invention which is also disclosed in the prior application (the parent or original nonprovisional application or provisional application). The disclosure of the invention in the parent application and in the later-filed application must be sufficient to comply with the requirements of the first paragraph of 35 U.S.C. 112. See *Transco Products, Inc. v. Performance Contracting, Inc.*, 38 F.3d 551, 32 USPQ2d 1077 (Fed. Cir. 1994).

The disclosure of the prior-filed application, Application No. 09/286,818, fails to provide adequate support or enablement in the manner provided by the first paragraph of 35 U.S.C. 112 for one or more claims of this application. Application No. 09/286,818 does not disclose a coating comprising a medicament.

\* \* \* \* \*

# Response to Arguments

Applicant's arguments have been considered but are moot in view of the new grounds of rejection.

\* \* \* \* \*

Art Unit: 1615

# Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 8-20 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,541,048 to Zyck et al. ("Zyck").

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Zyck teaches a product comprising a medicament comprising:

- the consumable tableted center of instant claims 8 and 16 (see col. 10, line
   3);
- the coating comprising a medicament of instant claims 8 and 16 (see col. 2, lines 18-23);
- the at least 50% coating by weight of instant claims 8 and 16 (see col. 10, line 29);

- the antacids of instant claims 9 and 17 (see col. 2, lines 18-23);
- the taste masking agent of instant claims 10, 12, and 19 (see col. 8, line 55);
- the xylitol of instant claim 11 (see col. 8, line 55);
- the aspartame of instant claims 13 and 20 (see col. 7, line 49); and
- the gummi confectionaries of instant claims 14 and 18 (see col. 1, line 65 col. 2, lines 25-27).

Zyck does not disclose a shellac layer.

ş

2. Claims 8-14 and 16-20 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,627,234 to Johnson, et al. ("Johnson").

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Johnson teaches a product comprising a medicament comprising:

- the consumable tableted center of instant claims 8 and 16 (see col. 10, line
   57);
- the coating comprising a medicament of instant claims 8 and 16 (see col. 2, lines 59-66);

Art Unit: 1615

 the at least 50% coating by weight of instant claims 8 and 16 (see col. 15, line 41);

- the analgesics of instant claims 9 and 17 (see col. 5, line 65);
- the taste masking agent of instant claims 10, 12, and 19 (see col. 12, line 38);
- the xylitol of instant claim 11 (see col. 12, line 38);
- the aspartame of instant claims 13 and 20 (see col. 9, line 27); and
- the gummi confectionaries of instant claims 14 and 18 (see col. 2, lines 59-66).
- 3. Claims 8-14 and 16-20 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 7,163,705 to Johnson, et al. ("Johnson").

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Johnson teaches a product comprising a medicament comprising:

- the consumable tableted center of instant claims 8 and 16 (see col. 13, line
   51);
- the coating comprising a medicament of instant claims 8 and 16 (see col. 3, lines 16-19);

Art Unit: 1615

the at least 50% coating by weight of instant claims 8 and 16 (see col. 12, line 1);

- the muscle relaxants of instant claims 9 and 17 (see col. 5, line 9);
- the taste masking agent of instant claims 10, 12, and 19 (see col. 13, line 66);
- the xylitol of instant claim 11 (see col. 13, line 66);
- the aspartame of instant claims 13 and 20 (see col. 13, line 17); and
- the gummi confectionaries of instant claims 14 and 18 (see col. 3, lines 16-19).
- 4. Claims 8-20 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,645,535 to Zyck et al. ("Zyck").

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Zyck teaches a product comprising a medicament comprising:

- the consumable tableted center of instant claims 8 and 16 (see col. 10, line 37);
- the coating comprising a medicament of instant claims 8 and 16 (see col. 2, lines 33-44);

Page 7

Application/Control Number: 10/044,113

Art Unit: 1615

the at least 50% coating by weight of instant claims 8 and 16 (see col. 9, line
 9);

- the antacids of instant claims 9 and 17 (see col. 2, lines 33-44);
- the taste masking agent of instant claims 10, 12, and 19 (see col. 9, line 17);
- the xylitol of instant claim 11 (see col. 9, line 17);
- the aspartame of instant claims 13 and 20 (see col. 8, line 13); and
- the gummi confectionaries of instant claims 14 and 18 (see col. 2, lines 33-44).

Zyck does not disclose a shellac layer.

# Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 8-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 7,056,541 to Stahl ("Stahl").

Stahl teaches a product comprising a medicament comprising:

- the consumable tableted center of instant claims 8 and 16 (see col. 1, line 38);
- the coating comprising a medicament of instant claims 8 and 16 (see col. 2, lines 37-49);

Art Unit: 1615

the vitamins of instant claims 9 and 17 (see col. 5, line 17);

• the taste masking agent of instant claims 10, 12, and 19 (see col. 7, line 21);

• the xylitol of instant claim 11 (see col. 7, line 21);

the aspartame of instant claims 13 and 20 (see col. 5, line 10); and

the gummi confectionaries of instant claims 14 and 18 (see col. 1, line 65 – col. 2, line 2).

It would have been obvious to on having ordinary skill in the art at the time the invention was made to omit the shellac layer of instant claim 15, since it has been held that omission of an element and its function in a combination where the remaining elements perform the same functions as before involves only routine skill in the art. *In re Karlson*, 136 USPQ 184.

Stahl explains that adding a medicament to the coating is beneficial because, "...active substance(s) is/are exposed to the consumer within a short period of chewing." See col. 2, lines 52-53.

While Stahl does not explicitly teach the percentages of instant claims 8, 12, 13, 16, and 20, it would have been obvious to one of ordinary skill in the art at the time the invention was made to determine suitable percentages through routine or manipulative experimentation to obtain the best possible results, as these are variable parameters attainable within the art.

Moreover, generally, differences in concentration will not support the patentability of subject matter encompassed by the prior art unless there is evidence indicating such concentration is critical. "[W]here the general conditions of a claim are disclosed in the

Art Unit: 1615

prior art, it is not inventive to discover the optimum or workable ranges by routine experimentation." *In re Aller*, 220 F.2d 454, 456; 105 USPQ 233, 235 (CCPA 1955). Applicants have not demonstrated any unexpected or unusual results, which accrue from the instant percentage ranges.

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to disclose a product comprising a consumable tableted center and a coating comprising a medicament, as taught by Stahl. One of ordinary skill in the art at the time the invention was made would have been motivated to make such a product because it quick exposure of medicament to the consumer, as explained by Stahl.

#### **Double Patenting**

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1615

Provisional

Claims 8-20 are provisionally rejected under the judicially created doctrine of

obviousness-type double patenting as being unpatentable over the claims of copending

Application Nos. 09/990,628; 10/206492; 11/269,980; 11/273,941; and 11/273,942.

Although the conflicting claims are not identical, they are not patentably distinct

from each other because the claims of the instant application and the each of the

above-cited copending applications claim similar subject matter. For example,

Application No. 10/206,492 recites a product including a medicament comprising a

tableted center and a coating including a medicament (see claim 8). Thus, the

compositions recited in the claims of the copending applications listed above are directly

within the scope of the compositions of the instant claims.

This is a genus-species situation, wherein the numerous species of the

copending application claims are directly within the scope of the large genus of the

pending claims, thereby creating an 'anticipation situation' in obvious type double

patenting.

Additional properties claimed are inherent by the use of the particular formulation

- a product comprising a consumable center and a coating comprising a medicament -

in combination with excipients known in the art.

There are numerous applications that may necessitate a double patenting

rejection due to the breadth of the claims, as can be seen by an inventors name search

Art Unit: 1615

of US Patents and Applications. It would constitute an undue burden for the Examiner to specifically analyze each of the numerous patent applications. A quick search turned up the copending applications above that appear to have similar subject matter as claimed. The Examiner requests a complete list of both patents and pending applications, which may initiate a double patenting rejection because of the undue burden presented by the numerous overlapping subject matter with the instant claims.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

#### Non-Provisional

Claims 8-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over the claims of U.S. Patent Nos. 6,355,265; 6,541,048; 6,426,090; 6,322,806; 6,290,985; 6,627,234; 6,465,003; 7,163,705; 6,773,716; 6,645,535; 6,558,692; and 6,355,265. Although the conflicting claims are not identical, they are not patentably distinct from each other because similar subject matter has been claimed in both the claims of the instant application and each of the above-cited U.S. Patents.

For example, U.S. Patent No. 6,322,806 recites a product including a medicament comprising a tableted gum center and a coating including a medicament (see claim 1). Thus, the compositions recited in the claims of the U.S. Patents listed above are directly within the scope of the compositions of the instant claims.

Art Unit: 1615

This is a genus-species situation, wherein the numerous species of the U.S. Patent claims are directly within the scope of the large genus of the pending claims, thereby creating an 'anticipation situation' in obvious type double patenting.

Additional properties claimed are inherent by the use of the particular formulation

– a product comprising a consumable center and a coating comprising a medicament –
in combination with excipients known in the art.

There are numerous applications that may necessitate a double patenting rejection due to the breadth of the claims, as can be seen by an inventors name search of U.S. Patents and Applications. It would constitute an undue burden for the Examiner to specifically analyze each of the numerous patent applications. A quick search turned up the U.S. Patents above that appear to have similar subject matter as claimed. The Examiner requests a complete list of both patents and pending applications, which may initiate a double patenting rejection because of the undue burden presented by the numerous overlapping subject matter with the instant claims.
